

11th International Conference on Electrostatic Precipitation
Oct 20-26, Hangzhou, China

CALL FOR PAPERS

The concept of providing a forum for the exchange of information on research and application of electrostatic precipitation originated with Dr. Harry J. White. Then, the first conference was held in Monterey, California, USA, in October 1981. And the succeeding meetings were held as follows: Kyoto, Japan in 1984, Abano Terme, Italy in 1987, Beijing, China in 1990, Washington, DC USA in 1993, Budapest, Hungary in 1996, Kyongju, Korea in 1998, Birmingham, Alabama in 2001, South Africa in 2004 and Australia in 2006.

Today, we not only need to achieve an higher ESP collection efficiency to match the latest standards, but also to control multi-pollutant emission, such as PM_{2.5}, SO_x, NO_x, Hg, VOC, HC. It has been a great honour for us to help organizing the ICESP XI conference in Hangzhou to share recent achievements, and we do believe in that the conference will become a very important bridge-stone in our scientific community.

CONFERENCE TOPICS:

1. ESP Fundamental and Applications
2. Fabric Filtration Fundamental and Applications
3. Multi-pollutant controls (SO_x, NO_x, Hg, HC, VOC)
4. Non-thermal Plasma for pollutant emission controls
5. Morden Electrostatics

PUBLICATIONS: Accepted contributions will be included in the Proceedings and on CD ROM. Both the proceedings and the CD will be available to registered delegates at the registration desk and a number of selected papers will be published on IJPEST.

DETAILS: please visit conference web: <http://www.icespxi.com/>
